United World Securities Japan K.K.

(title)

### **Introduction of the new “AND” trading system to “United Commodity” commodity futures trading**

United World Securities Japan K.K. (HQ: Tokyo, Minato-ward, Akasaka, CEO: Toshiyuki Tateishi) is pleased to announce launch of the “United Commodity AND” service from June 22, 2007 (Fri), an online commodity futures trading service upgraded with the introduction of the new “AND” trading system. The new AND system realizes convenient order functions and great operability far exceeding those of the current trading system.

#### Features of “United Commodity AND”

With the new trading system, our “United Commodity AND” will offer dramatically improved order functionality, operability and chart functions, which satisfies the high requirements of day traders, and is also user-friendly enough for use by those who are new to commodity futures trading.

#### New functions

Order functions: Eight new order methods added

1. Limit orders: Orders submitted automatically when pre-designated stop-loss level is reached
2. Pre-set time orders: Orders made at pre-set times and dates
3. Batch orders: Request several orders at once, or make changes or cancellations for several orders at once
4. Chain orders: Request orders by setting conditions for four different orders
5. Cart orders: Save orders in a cart in advance and request the orders at the timing of your choice
6. Quick orders: Orders easily made by the click of a mouse while consulting prices
7. Reverse Orders: Reverse selling and buying positions with an order
8. Special arbitrage order: Enables IFD and IFO orders for arbitrage trading

#### Operability

- Orders can be made from market price lists or chart screens
- Unsettled positions can be confirmed on chart screens
- Settlement orders can be altered from chart screens

United World Securities Japan K.K.

- The operating screen can be freely customized

#### Chart functions

- “Market Profile” enables easy assessment of market situations with the existing charts and trading volume analysis
- The Fibonacci series, an analysis using the Fibonacci formula, often referred to as a golden rule of investing

The “United Commodity AND” service will incur no expense for those clients who have a “United Commodity” user ID.

Investors should consider carefully the investment objectives, risks, charges and expenses before investing. For details, please refer to our Japanese website.
